

Understanding TCD In VA and the potential role of other stressors in walnut decline
Norman L. Dart

Results of previous work

- Delimiting WTB/TCD distribution in VA

Objectives of current research

- Delimiting WTB/TCD distribution in VA
- See future direction below...

Future direction

- Quantify walnut health in and outside of the WTB/TCD delimiting zone, is there a significant difference? Are mortality levels/decline levels different (we see a lot of decline in our area not associated with WTB/TCD).
- Are most severe cases of this disease associated with marginal sites/other forms of stress?

Estimated duration

5-20 years
